BOARD OF PUBLIC WORKS

June 7, 2014

Ms. Bose,

I'm writing you, the governor, and the BPW to voice my support for Dominion Cove Point's proposed LNG export project. I am a lifelong resident of Calvert County and a local charter boat captain. My company has worked closely with Dominion to benefit the Wounded Warriors project with a day of fishing, and I was tremendously impressed with the contribution they made to the artificial barrier reef constructed from the former Woodrow Wilson Bridge. I also have respect for the sensitivity they lend to the community and their immediate neighbors.

Dominion has consistently demonstrated their intentions to do the right thing in every area: progress and industry, environmental preservation, and economic solvency for the community and the state. Clearly, this is a company that gives back. I'm not alone in this view; over a 1,000 Calvert residents showed up to support Dominion Cove Point three days after your EA was released. Then again at your recent hearing, more than 800 residents showed up to voice their will that this project be allowed to move forward.

The residents of this county appreciate the sound research that has gone into your thorough report, and they already know from experience that Dominion is a proven community partner. Please, I urge you to listen to the will of the people, and continue your course of approval for this much needed project.

Thank you greatly,
